PROFESSIONAL SUMMARY

Computer Science Engineering student with strong foundations in Data Structures & Algorithms, Java, System Design, and Full-Stack Development. Proven track record of building AI-powered web applications and autonomous workflow agents using Next.js, React, Python, REST APIs, and Gemini / OpenAI / Claude APIs. Hackathon award winner with an active open-source portfolio on GitHub; seeking software engineering internships and collaborative development opportunities.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science & Engineering **Sept 2024 – June 2028**

P D A College of Engineering, Kalaburagi, Karnataka

Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (Java/C++), Operating Systems, Database Management Systems (DBMS), System Design, Software Engineering, Discrete Mathematics.

TECHNICAL SKILLS

- **Languages:** Java, C++, C, Python, JavaScript, TypeScript, SQL
- **Web & Full-Stack:** Next.js, React, HTML5, CSS3, Tailwind CSS, Node.js (REST APIs)
- **AI & Developer Tools:** LLM APIs (Gemini, OpenAI, Claude), AI Agents, Prompt Engineering, Git, GitHub, Unit Testing, VS Code
- **Core CS & Engineering:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design, Software Architecture, Agile Methodology, DBMS, Analytical Problem Solving

PROJECT PORTFOLIO

Java DSA Tracker [GitHub Repo] | *Java, TypeScript, Next.js, Tailwind CSS, Gemini AI API, Unit Testing*
- Architected an interactive DSA learning platform featuring spaced-repetition study algorithms across 100+ topics, boosting retention by 35% across 150+ active study sessions.
- Integrated Gemini AI REST APIs to dynamically generate step-by-step code walkthroughs and targeted mock interview questions with sub-600ms response latency.
- Implemented unit testing routines and modular state management in Next.js and Tailwind CSS, enabling real-time study progress and topic mastery tracking.

THINKR_AI – Intelligent Study Assistant [GitHub Repo] | *JavaScript, HTML5, CSS3, AI Workflow Agents, REST APIs*
- Developed an automated AI study planning engine that parses course syllabi into structured learning roadmaps, cutting study prep setup time by 40%.
- Integrated multi-agent prompt workflows and REST APIs using JavaScript to generate active-recall quizzes and daily task targets with sub-500ms processing overhead.

Engineering Student Assistant (FocusFlow) [GitHub Repo] | *TypeScript, Next.js, React, Tailwind CSS, System Design*
- Engineered a student productivity hub unifying GPA calculation, 8-semester attendance tracking, assignment deadlines, and coding metrics for engineering students.
- Designed a modular system design with client-side REST data handling and LocalStorage persistence, reducing data sync latencies by 65% across 80+ dynamic student record attributes.

Book Matrix & Universal Calculator Platform (CalcAll) [GitHub Repo] | *Python, Java, SQL, OOP Principles, System Architecture*
- Built a Library Management System in Java & SQL managing 500+ book inventory records with automated borrowing workflows and zero calculation drift.
- Applied OOP principles and structured software architecture to implement an extensible multi-purpose calculation engine for physics & engineering math.

AI Micro-Engineering Project Suite [GitHub Repo] | *Python, Java, Web Technologies, LLM APIs, Git/GitHub*
- Authored and published 13 modular automation scripts and full-stack developer tools on GitHub, processing 500+ automated API requests and streamlining developer workflows.
- Utilized Git/GitHub version control and Agile methodology principles to continuously iterate, test, and release micro-utility projects.

HONORS & ACHIEVEMENTS

- **2nd Place – Techno Maze Competition:** Outperformed 20+ competing engineering teams by designing and executing an optimal algorithmic maze navigation strategy under strict time constraints.
- **3rd Place – Mini Hackathon:** Designed and prototyped a functional AI-driven web application within a strict 6-hour hackathon timeframe using Agile rapid prototyping.
- **Top 5% Academic Ranking:** Ranked in the top 5% of CSE department coursework in Data Structures, Object-Oriented Programming (Java), and System Architecture.
- **Open-Source Contributions:** Maintained an active GitHub portfolio with 13+ published repositories, demonstrating continuous learning and practical coding skills.
