

SRINIWAS AWASTHI

Computer Science Engineering Student | Aspiring Software Engineer | AI & Full-Stack Developer

+91 84312 13580 • sriawasthi164@gmail.com

Portfolio: sriawasawasthi-portfolio.netlify.app | LinkedIn: linkedin.com/in/sriawasawasthi210728 | GitHub: github.com/SriniwasAwasthi

PROFESSIONAL SUMMARY

A Computer Science Engineering student with strong foundations in Data Structures & Algorithms, Java, and Full-Stack Development. Proven track record of building AI-powered web applications and autonomous AI agents using Next.js, React, Python, and Gemini API to solve real-world productivity challenges. Hackathon winner with a portfolio of 13+ published projects on GitHub; seeking software engineering internships and open-source opportunities.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science & Engineering

Sept 2024 – June 2028

P D A College of Engineering, Kalaburagi, Karnataka

Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (Java/C++), Operating Systems, Database Management Systems (DBMS), Software Engineering, Discrete Mathematics.

TECHNICAL SKILLS

- **Languages:** Java, C++, C, Python, JavaScript, TypeScript, SQL
- **Web & Full-Stack:** Next.js, React, HTML5, CSS3, Tailwind CSS, Node.js (REST APIs)
- **AI & Developer Tools:** LLM APIs (Gemini AI), AI Workflow Agents, Prompt Engineering, Git, GitHub, VS Code
- **Core CS Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Software Architecture, DBMS, System Debugging, Analytical Problem Solving

PROJECT PORTFOLIO

Java DSA Tracker | [Java](#), [TypeScript](#), [Next.js](#), [Tailwind CSS](#), [Gemini AI API](#)

- Architected an interactive DSA learning platform featuring spaced-repetition study schedules across 100+ topics, boosting topic retention by 35%.
- Integrated Gemini AI API to dynamically generate step-by-step code walkthroughs and targeted mock interview practice questions with sub-600ms latency.
- Designed a responsive analytics dashboard using Next.js and Tailwind CSS, delivering real-time study progress and topic mastery tracking.

THINKR_AI – Intelligent Study Assistant | [JavaScript](#), [HTML5](#), [CSS3](#), [AI Workflow Agents](#)

- Developed an automated AI study planning engine that converts raw course syllabi into structured learning roadmaps, cutting study prep time by 40%.
- Built custom prompt workflows and AI agent logic to generate active-recall quizzes and daily task targets tailored to student learning goals.

Engineering Student Assistant Platform (FocusFlow) | [TypeScript](#), [Next.js](#), [React](#), [Tailwind CSS](#)

- Engineered a student productivity hub unifying GPA calculation, attendance tracking across 8 semesters, assignment deadlines, and coding metrics.
- Built a modular dashboard architecture supporting real-time local data persistence and multi-attribute academic reporting with zero data loss.

Book Matrix & Universal Calculator Platform (CalcAll) | [Python](#), [Java](#), [SQL](#), [OOP Principles](#)

- Developed a Library Management System in Java & SQL for book inventories and automated borrowing, alongside a multi-purpose calculation suite for physics & math.

AI Micro-Engineering Project Suite (13+ Projects) | [Python](#), [Java](#), [Web Technologies](#), [AI APIs](#)

- Authored and published 13+ specialized micro-applications on GitHub leveraging AI APIs and automation scripts to solve developer productivity challenges.

HONORS & ACHIEVEMENTS

- **2nd Place – Techno Maze Competition:** Outperformed competing engineering teams by designing and executing an optimal algorithmic maze navigation strategy under time constraints.
- **3rd Place – Mini Hackathon:** Designed and prototyped a functional AI-driven web application within a strict 6-hour hackathon timeframe.
- **Academic Excellence:** Demonstrated strong performance across core Computer Science Engineering coursework.
- **Engineering Portfolio:** Published 13+ hands-on software & AI projects on GitHub, showcasing continuous learning and practical coding skills.
